

CYCLOPIDES CRITHOTE. 15, 16.

UPPERSIDE dark brown. Anterior wing with nine semitransparent white spots, two of which (below the usual subapical spots) are very minute: an ochreous spot near the inner margin.

UNDERSIDE. Anterior wing as above except that the margins are rufous. Posterior wing ochreous-brown crossed by three linear brown bands.

Exp.  $1\frac{1}{10}$  inch. . Hab. Ecuador. (Buckley.)

In the Collection of W. C. Hewitson.
